

 **CareTech**®

Call for care

Automatic monitoring of function

Built-in multifunction button

“Click-in” accessories

Erik radio alarm button

What determines how an alarm button should look? When developing products, CareTech focuses on the needs they have to satisfy. CareTech's Erik radio alarm button is the result of many years of experience and accumulated knowledge of the features that users, care staff and relatives value most of all. The Erik radio alarm button has two buttons. Normally one is used for an alarm (such as an assistance alarm), while the other can be used for other purposes, such as an assault alarm, staff call button or intruder alarm. CareTech's Easy Press Concept (EPC) means that people with impaired hand movement can easily call for assistance. A choice of three “Click-in” accessories offers considerable flexibility and many different applications. Automatic monitoring of function gives assurance that the button works and that it is within range. The Erik radio alarm button is compatible with CareTech's various alarm systems and carephones.
